Certified Forensic Document Examiner/Handwriting Expert

NLP of California

Greater Omaha, Nebraska

I completed my training with Dr. Marie Cassil in 1976 and have been active as a Handwriting Expert and Forensic Document Examiner since 1980. Since that time I have studied and become Certified by the Scientific Association of Forensic Experts, SAFE, as a Forensic Document Examiner.

As a Handwriting Expert I specialize in handwriting....I know about Personality Profiling and have worked in the capacity of using handwriting to "Hire the Best and Train the Rest".....as well as the entertaining area of this discipline.

As a Certified Forensic Document Examiner I specialize in the identification of authenticity of documents and the handwriting and/or signatures that appear on the documents. When the documents are involved in a legal matter I prepare illustrations and opinions for testimony in court as an Expert Witness.

I started my training in Neuro Linguistics in 1985 and have become a Master Practitioner as well as Certified Life Coach. It is a specialized field and provides me with knowledge about how people learn behavior and responses.

I consider myself to be talented in many fields of expertise and know that I am fulfilling my personal purpose for life....to me this is the real meaning of life. I rely on the feedback from others to confirm that I am doing a good job, that is what gives my work real meaning!

Specialties: I have become skilled at helping others resolve issues....from handwriting questions to the emotional pain of personal trauma....I specialize in holding the space and directing myself and others to a better "point of view".....I specialize in setting intentions and producing positive outcomes!

The study of Neuro Linguistics is a study of human responses that are created by our own sensory input. Each of us experience situations and form beliefs and behaviors based on how we have the information stored or "wired" into our brain.

For example: If someone, as a child, eats so much butterscotch pudding that it makes the person vomit, then the thought of butterscotch pudding in the future could create the same upset stomach, maybe not to the point of vomiting, but to the point of "no desire for butterscotch pudding"....basically everything that happens to us is recorded and impact us in some way and the discovery of these responses can literally change a person's life for the better.

The joyful experiences that happen are wired as well..... and can create pleasant responses when triggered by a current event so....doesn't it seem wise to choose to use the better of these responses to create our lives?
