Education

-

The University of Texas at Austin - Red McCombs School of Business

Degree Name Master of Science (MS)

Field Of Study Technology Commercialization (Entrepreneurship)

The Master of Science in Technology Commercialization (MSTC) degree is a one-year business program that prepares individuals for successful entrepreneurship and for fields such as technology assessment, intellectual property (IP) development, technology transfer, product licensing, product line development and management, business development, and strategic planning. The curriculum is about action-based learning where students work on real technologies and learn how to assess and calculate the viability of the product, identify the correct market, and finally launch the product for profit. The Texas MSTC program is focused on technology commercialization and acquiring the business-skills necessary to take a product from the drawing board to market with a strong focus on entrepreneurship. The program teaches students how to 'bridge the gap' between technology and the

needs of consumers in a commercially viable manner.
