Office 365

Two Powerful Clouds, One Amazing Experience

Rocket Matter is excited to announce our robust new integration with Microsoft Office 365! This powerful combination provides real-time two-way calendar and contact synchronization, as well as the ability to upload your emails and Word, PowerPoint, and Excel documents directly to Rocket Matter. It's the perfect solution for busy law firms who are looking to reduce overhead and increase billable hours.

Track Emails

Upload your emails from Outlook on a Mac or PC directly into a matter. You can also add billable time and, if you like, import your attachments as well.

Sync Contacts

Now you can leverage our bidirectional contact sync so that your Rocket Matter account has all of the same contacts that you have in Outlook, and vice versa.

Full Document Versioning

To allow lawyers to work collaboratively with the Rocket Matter Office 365 Integration, all of the documents uploaded from Office are versioned. This feature alone is a significant improvement in Rocket Matter's document storage and organization capabilities.

Sync Calendars

Sync all of your Outlook calendar events effortlessly with Rocket Matter. This integration allows you to keep track of your calendar events inside your matters.

Upload Documents

You can upload your documents directly to Rocket Matter from within Word, Excel, and PowerPoint. You can also bill for the time you work on your files.

Work From Anywhere

Law firms can use Microsoft Office 365 on PCs, Macs, Chromebooks, or smartphones. Also, because of the cloud-based nature of both software platforms, legal professionals can use the Rocket Matter Office 365 Integration from anywhere on nearly any machine.

Experience the pinnacle of legal productivity with the Rocket Matter Office 365 Integration. You can always speak to a knowledgeable U.S.-based product specialist by calling **1-888-4321-LAW**, or get started today by visiting us at **www.rocketmatter.com**!
